

# Finding training insights and data

One of the most valuable aspects of VR safety training is the ability to collect a user's training session data and then analyse that data to draw conclusions, giving us a much more in-depth insight into their learning. From the **Training Insights** page, you are able to review the results of your users when they complete a course.

## How to access training insights

You can access these sessions by clicking on the **Training Insights** tab on the left navigation bar. This will bring up a list of all the training sessions completed by users in your organisation.

By default, session will be sorted by most recent sessions first, however you can use the search bar to search for a particular member, or use the filter icon to filter by date range or experience. You can also choose to see members of the organisation's divisions, in-progress training or incomplete sessions.

The screenshot displays the 'NextWorld Virtual Reality' dashboard. On the left is a dark navigation sidebar with the following items: 'NextWorld Super Admin Root', 'A Very Safe Company Organization', 'Dashboard' (highlighted), 'Training Insights' (with a mouse cursor), 'Trainees', 'Training Programmes', 'Training Schedule', 'Experiences', 'Admin', 'Logout', and 'Support'. The main content area is titled 'Dashboard' and contains two sections: 'Top Experiences Last 7 days' and 'Recent Sessions Last 7 days'. Below these is a table with columns: 'EXPERIENCE', 'SESSION COUNT', 'TRAINEE COUNT', 'LAST TRAINEE', and 'LAST SESSION'. The table is currently empty, showing a 'No items found' message with a search icon. At the bottom of the dashboard, there is a footer with the 'NEXT WORLD VIRTUAL REALITY v1.150' logo and links for 'Support', 'Contact Us', 'Privacy Policy', and 'Terms of Service'.

From here, you can click on a session to view its results.
