How to Access Other VR Applications

How to Access Non-Next World Applications

The Next World software natively runs in kiosk-mode, meaning it only allows one application (Next World Home) to run. However, if you need to access other Apps installed on your device, you can do so by following the below steps:

1. From the main agent screen, select the **Settings** button on the bottom right to go to Next World Agent's settings
2. Scroll down and select **System Apps**
3. Click on **Appmanager** and select "yes" to launch. This will show you all of the currently installed Apps on your device

To go back to the Next World Agent, select **Back** or **Exit** on the bottom navigation buttons until your reach the home screen.
