v1.16: Training States

In this latest update, we bring higher visibility into what trainees require training, and the current state of their training within their Training Cohorts.

NEW FEATURE!

Training States (managed by Training Cohorts)

After assigning trainees to one or many Training Cohorts, their overall training status will now be displayed as an icon on their avatar. There are many states, each denoting a stage on a trainees journey from being added to the platform, to achieving their completion certificate.

You can find out more about this feature here

Looking Forward

We hope these new features improve how training is allocated, and increase visibility into who requires the most help to succeed!
