v2.5.8: Soft Skills and Arabic Locale Updated

In this release, we've released Soft Skills experiences for our clients to use, the Arabic language for our experiences and applications has been drastically improved, and many bug fixes and improvements have been completed for our LMS.

Platform / LMS

Many bug fixes and improvements, including with batch user adding and some CSV generation.

You can now view experience overviews and course guides without needing to log into the LMS, as long as you have the URL for the experience you wish to view

New Soft Skills partner - Bodyswaps!

We have partnered with Bodyswaps, a VR Soft Skills provider, to bring you many soft skills training experiences including but not limited to:

- Public Speaking
- Interview Skills
- Communication in the Workplace
- Saying No to Sexual Harassment
- Microagressions
- Biases and Inclusion
- Giving Feedback
- Acting with Empathy

You can enquire about access to these soft skills training courses and more at enquiry@nextworldxr.com or contact your Next World representative.

Arabic 2.0

We have done a major overhaul of the Arabic language for our Home application and all of our experiences. This applies to both written Arabic and spoken Arabic.

If you have any questions related to the update or things mentioned in this news article, please feel free to reach out. If you are experiencing any issues or have additional suggestions for these features and improvements, we gladly accept your feedback.

That's all for now, look forward to the next release!
